

Difficulty of the Design Process

Design is a difficult and challenging task

This is because it involves the application of:
language knowledge, development experience,
domain knowledge, design experience, creativity

This is clearly going to be difficult for you now
But we have to start sometime !

HELP !

Fear not - help is at hand !

There are techniques to help you get started

They can be fairly naive and basic, but it's a start

They get you past the "blank sheet of paper" stage

Noun-Verb Analysis

This approach is fairly straight-forward...

Write out a description of the desired solution

Or (if you are in a group) discuss it in detail

Anything that is a noun (name) becomes a Class

Anything that is a verb (doing word) is a Method
