

## Stage 2: Identify “User Stories”

A popular way to record user needs...

*As a < type of user >, I want to < some goal >  
so that < some reason >.*

*As a diner, I want to be able to order a meal, so  
that I can eat it and no longer be hungry.*

*As a chef, I want to be able to identify time  
consuming dishes, so that I have the time to cook  
them and deliver the order in a reasonable time.*
