# Kanban Board

- Useful concept taken from the Kanban method

- Basically a flexible "ToDo" list structure
- Issues progress through various states
  (from "ToDo" to "Done")

- Originally based on post-it notes on a whiteboard
- Various digital tools now fulfil same function

Kanban Board

TO DO	IN PROGRESS	DONE
Write Agile Lecture ☑ TES-7	**Write Introductory Lecture** ☑ TES-2	**Create Assessment Brief** ☑ TES-4 ✓
Try out project allocation form ☑ TES-8	**Write first practical exercise** ☑ TES-3	
Allocate student to projects ☑ TES-9		
+ Create issue		

Columns (Swimlanes)

- It is common to start with just three columns
- You can customize the layout

- For example, you might have columns for:
  - Backlog
  - Being Verified
  - Awaiting integration

- Some even use "blocked" & "expedited" rows
  (although this is not explicitly supported in Jira !)

- Do what works for your team
  (as long as you have a "done" column !)
